

Civil Engineering

Course Name

Buildings & Civils – Geotechnical - Retaining Walls

Course Description

This eLearning forms part of the Geotechnics Training Programme focusing on Retaining Walls. This module provides an overview of different types of retaining walls and their failure modes. The content will not give detailed guidance on structural inspections but will provide basic information and signpost relevant documents and standards. It also provides an understanding of the principles of retaining wall design, but it does not on its own lead to competence in designing a retaining wall or signing off a design done by others.

Audience
