

Signal Engineering

Course Name

Flex IOMSL FLMF (Add-On)

Course Description

This training is aimed at employees within Network Rail to provide sufficient knowledge of the Flex level crossing systems in addition to pre-existing knowledge of the VAMOS level crossing system. It will allow delegates the opportunity to practice installation and maintenance of these systems. The aim of this course is to equip the delegate with the knowledge and skills required to enable them to fulfill their duties as per the relevant work instructions. The delegate will attain level 3 competence upon successful completion of the assessments.

Audience

Network Rail employees who already possess the VAMOS competence but require up skilling for the Flex system

Duration: 1 Day(s) **Class Size:** 6
