

Signal Engineering

Course Name

EbiGate200 MSL Overlay FLMF

Course Description

To make delegates aware of the roles and responsibilities associated with the EbiGate 200 Enhanced User Worked Level Crossing System and to give them the knowledge and skills necessary to carry out first line maintenance and faulting duties in line with the relevant Network Rail & industry standards. Mentorship: On successful completion of the course assessments, a 'Statement of Achievement' will be issued to the delegate. Following completion of the training each delegate shall undertake a period of mentored workplace experience to enable the learning to be consolidated through practical workplace experience.

Audience

This course is designed to train technicians who are required to undertake corrective and preventative maintenance of EBiGate200 MSL. This course is suitable for technicians / engineers who are familiar with the basic principles of Level Crossing systems.

Duration: 3 Day(s) **Class Size:** 6
