

Signal Engineering

Course Name

Failure and Incident Testing (Level 1)

Course Description

Understand the procedures that are for the reporting and recording of wrong side failures. Understand how to recognise the implications of the failures symptoms in the operational safety of the railway in determining the classification of the fault. Understand which types of failures have requirements for the preservation of evidence and how it should be implemented.

Audience

This course is designed to train persons who are responsible for the maintenance, faulting repairing or testing of the Signal Engineering equipment, who undertake initial diagnosis of failures to determine the necessary course of action.

Duration: 2 Day(s) **Class Size:** 4

Competence Name Awarded

CCS Signal Maintenance Testing SFI Level 1

Competence Awarded

SIG MAINT TEST SFI 01

Course Code

SIG MAINT TEST SFI 01

Prerequisite Name

CCS Signal Maintenance Testing Core Skills

Prerequisite Short Code

SIG MAINT TEST SMTH.a

Skills Assessment Scheme Regime

T3+

Course Type

Face to Face
