Telecoms Engineering

Course Name

FRMCS Fundamentals

Course Description

The FRMCS fundamentals will provide a fundamental understanding of Telecoms Future Railway Mobile Communication System, the training will deliver a high-level overview of the technologies used in a digital railway. Voice communications, ETCS, ATO, CDAS, and TM will all be integrated into the digital railway. The training will define the place of 5G and FRMCS as well as the consideration that should also be given to how FRMCS can coexist with GSM-R initially, as well as the migration options available to railways.

Audience

Duration: 120 minutes Day(s) **Class Size:** 9999

Competence Name Awarded

Fundamental understanding of FRMCS
