

Track Engineering

Course Name

Interim Manual Rail Grinding of Plain Line, S&C; - Refresh Training & Assessment

Course Description

It is acknowledged that there are a number of Grinding Operatives in the Supply Chain who have long experience and good level of knowledge and skills. For those colleagues, attending a full 10-days course will not be productive or cost-effective, and may also create backlogs with planned grinding work on Network Rail track infrastructure.

This externally-delivered refresher training and assessment awards TR80 competency to colleagues with a minimum of 6 months experience. The total duration of this externally delivered refresher and assessment event is 5 days, with the contents based on the approved 10-day Neway Grinding Course covering Plain Line and S&C modules.

Audience

• Grinding Team Leaders • Grinding Technicians • Grinding Operatives

Duration: 5 Days Day(s) **Class Size:** 6

Competence Name Awarded

Interim Manual Rail Grinding of Plain Line, S&C-Refresh; Training & Assessment

Competence Awarded

Tr80c

Course Code

Tr80c

Prerequisite Name

Personal Track Safety (PTS), Undertake Liquid Penetrant Testing, Undertake Magnetic Particle Testing, PUWER

Prerequisite Short Code

PTS, NDT LPT, NDT MPT, NCB - GEN29

Skills Assessment Scheme Regime**Course Type**

Face to Face - Personal Protective Equipment

Download Date: 20/5/2024
