

Track Engineering

Course Name

Specify and manage seasonal preparedness

Course Description

This course is a two-part event. Delegates must enrol in the computer-based pre-reading on Oracle first, called 'Specify and manage seasonal preparedness prequalifier'. This will take approximately 3 hours to complete and the PDF can be downloaded if required. Delegates must pass the assessment at the end of this prequalifier before they can enrol in the 'Specify and manage seasonal preparedness' face-to-face training event. The two-part event is designed to develop delegates who are responsible for specifying and managing seasonal preparedness as part of their duties on Network Rail Infrastructure.

Audience

This course focuses on tactical management but is also aimed at delegates who aim to progress into the role of TME, ATME, SM (T), SAE, PTO and RME. Delegates should possess either the 610D knowledge OR be a TME who has been in post for 12 months.

Duration: 1.5 Day(s) **Class Size:** 10

Competence Name Awarded

Specify and manage seasonal preparedness
