IT & Systems

Course Name

Microsoft Power BI Reports and Dashboards for Business Users

Course Description

Power BI provides a variety of methods for using reports and dashboards within which data can be viewed and analysed visually.

This course covers the use of existing Power BI Desktop or Power BI reports and dashboards. It will identify core features, terminology and processes applicable when using reports or dashboards. Its principal aim is to provide the skills to enable a delegate to work with the reports and dashboards effectively.

Please note – this course does not cover creating reports or dashboards.

Audience

Anyone whose role requires them to use existing Power BI Reports or Dashboards to consume the contents. Roles can include management at all levels, team leaders or anyone who needs to commission the production of reports or dashboards. It is assumed that attendees on the course are familiar with charts. Learners who wish to learn how to create Power BI Reports should attend the Microsoft Power BI Desktop QAPBIDT3 course

Duration: 1 Day(s) **Class Size:** 8
