

Lineside Management

Course Name

Drainage & Lineside - Drainage Survey & Assessment Level 1

Course Description

This e-learning course aims to give participants an understanding of Network Rail Standards related to Drainage Survey and Assessment. Participants will learn the stages of the drainage lifecycle and the relevant standards for this process. They will also understand the water management principles applicable to drainage survey and assessment, including key points of the water management strategy. The course covers different types of drainage survey, including intrusive survey techniques, and various methods and formulas for drainage assessment. By completing this course, participants will have the knowledge and skills to recall Network Rail Standards, understand water management principles, identify different types of drainage survey, and utilise various methods of drainage assessment. Upon completion of this course and successfully passing the assessment, Level 1 Professional Competence will be awarded.

Recommended pre-learning for this course - Drainage Inspection and Maintenance Level 1

Audience

Individuals involved in drainage survey and assessment activities, including those responsible for conducting surveys, assessing drainage systems, and implementing water management strategies.

Duration: 0.25 Day(s) **Class Size:**
