

Switches and Crossings

Course Name

SO Supplementary Drive

Course Description

This module is designed to train persons who are responsible for undertaking SO Supplementary Drive maintenance and faulting activities as part of their duties on Network Rail Infrastructure.

Audience

Personnel who are responsible for: Routine signalling maintenance, Installation and Faulting where equipment is installed. Signalling maintenance grades whose work involves the maintenance, Installation or Faulting of the SO Supplementary drive system.. Attendees for this event should already be competent in IBCL's (In-Bearer Clamplock) and this is a 1 day event to convert from an IBCL competency. If no previous Clamplock competencies held then STF xx Full RCPL / IBCL event 5 days should be attended instead before attendance of the 1 day SO event. If RCPL held and IBCL not held then the HY-Drive conversion event (3days STFxx) should be considered.
