

Elearning

Course Name

089 Technical Briefing - NR/L2/MTC/089 - AMP Process Briefing

Course Description

This eLearning provides a comprehensive briefing on the requirements of NR/L2/MTC/089, the process for introducing new assets or affecting existing assets on Network Rail infrastructure through the development and implementation of an asset management plan (AMP). It defines: 1. the responsibilities for the various elements of inspection and maintenance before, during and after project works. 2. the relationships and the exchanges of information between the Maintainer, Asset Owner and the Project Manager; and 3. the required AMP deliverables in support of project works. It is applicable to all roles identified in the RACI and is intended to provide a consistent briefing on the requirements and intended application of the process.

Audience

All job descriptions which fulfil the roles described in the standard.

Duration: 0.13 Day(s) **Class Size:** N/A
