Track Engineering

Course Name

Assure the Lateral Stability of Track

Course Description

This course is designed as part of the TME suite of learning modules, to develop delegates who are responsible for managing the lateral stability of Track as part of their duties on Network Rail Infrastructure. It is designed to develop a person's knowledge, understanding and skills and is therefore particularly suited to persons required to prove their capability in these areas. This course focuses on tactical management but is also aimed at delegates who aim to further progress from their roles.

Audience

• TME • ATME • Individuals identified as part of succession planning to these roles

Duration: 2 Days Day(s) **Class Size:** 10
