

Track and Civil Engineering

Course Name

Buildings & Civils - Geotechnical - Earthworks Drainage

Course Description

This Module describes drainage and catchment systems to show a general awareness of their design and operation. To identify the common drainage system components and explain the importance of drainage management in terms of slope and retaining wall stability. Define geotechnical considerations for existing and new drainage scenarios apply the theories of catchment studies and scour prevention to problems identified on the rail network..

Audience

Geotechnical Engineers Route and Region Geotechnical Teams, Buildings & Civils Asset Management & Project Teams

Duration: 2 Hours Day(s) **Class Size:** 1
