

# Signal Engineering

**Course Name**

ETCS System Fundamentals 2 - Introduction and Reference Design

**Course Description**

System Fundamentals 2 builds on the information provided in the System Fundamentals 1 suite of learning, covering some of the topics already addressed in more detail, as well as providing information geared to supporting project delivery teams. This course will be useful to a range of technical roles working on an ETCS scheme but in particular Project Engineers and Test and Commissioning engineers. The first section of the course, Introduction and Reference Design, aims to provide an appreciation of Reference Design topics and assist with their application to GB ETCS deployments.

**Audience**

Scheme Designers Project Engineers Test and Commissioning Engineers Other technical roles working on ETCS schemes

**Duration:** 1 Day(s) **Class Size:**
