

Railway Operations

Course Name

Operational Decision Making

Course Description

Operational Decision Making (ODM) is a process to enable sound operating decisions during an unplanned event or emergency, to allow the safe movement of trains, or to manage a scenario that could adversely impact passengers and staff.

This course will help you to understand the key concepts of the National Operating Procedure (NOP) 3.06 and teach you when and how to implement the Operational Decision Making process.

Audience

Operational staff who are required to make decisions during unplanned events or emergencies in accordance with National Operating Procedure (NOP) 3.06.
