

Railway Operations

Course Name

Signal Overrun Assessment Toolset (SORAT) - Combined Training & Assessment

Course Description

This course aims to provide delegates with knowledge and understanding of how to use the Signal Overrun Assessment Tool (SORAT). This is a combined 3-day event which enables delegates to undertake the learning and assessment to achieve competence. To achieve competence, delegates will be required to participate in an assessment carried out by an independent verifier.

Audience

The audience is primarily Operations Risk Control Coordinators and Signal Design Engineers whose role includes Signal Overrun Risk.

Duration: 3 Day(s) **Class Size:** 8
