

Railway Operations

Course Name

Train Movement Viewer (TMV)

Course Description

This online training aims to introduce the key concepts of Train Movement Viewer (TMV) and demonstrate the core functionality of the system for standard users. The training includes interactive scenarios which allows learners to see examples of system use and practice key steps. This is systems training, which is not role specific, as such learners are also able to navigate around the eLearning and only complete the sections which are relevant to their role via the main menu. This course will not award a competence.

Audience

This course is intended for operational roles such as Controllers, Signallers, Incident Officers etc.

Duration: 0.25 Day(s) **Class Size:**
