

Civil Engineering

Course Name

Buildings & Civils - Geotechnical - RSHI: Introduction & Principles

Course Description

The Rock Slope Hazard Index (RSHI): Introduction and Principles module is pre-learning to the face to face RSHI course and one of four modules looking specifically at rock slope examinations using the RSHI. The RSHI is one of the examinations covered within the NR/L3/CIV/065 standard. In this introductory section we explain when an RSHI should be applied within the wider context of earthwork examinations. Later sections provide instruction and training on the types of data collected as part of the RSHI.

Audience

Rock Slope Examiners only who are attending the Rock Slope Hazard Index training course.

Duration: 0.25 Day(s) **Class Size:**
