

Civil Engineering

Course Name

Buildings & Civils - Geotechnical - Rock Slope Examinations: Remedial Works

Course Description

The Remedial Works module is the last of four pre-learning modules to the face to face Rock Slope Hazard Index course forming part of the Geotechnics Training Programme. This module covers the recording of any rock slope remedial works that exist on the slope. It is necessary to understand the types of remedial work, the circumstances/ conditions in which they are used and their effectiveness at treating the rock slope hazards noted.

Audience

Rock Slope Examiners only who are attending the Rock Slope Hazard Index training course.

Duration: 0.25 Day(s) **Class Size:**
