

Health and Safety TV

Course Name

Introduction to Hydraulics

Course Description

This programme looks at the basic hydraulic principles that underpins the operation of all hydraulic systems. You will carry out a series of practical exercises on our training rigs to help reinforce your level of understanding. Designed for those being introduced to Hydraulics for the first time, this basic course will provide an insight to the major building blocks of a Hydraulic Circuit and the function of the various components. Health and Safety plays an important role relating to any one working closely to or on systems incorporating Hydraulics and this course will introduce safe working procedures to be followed at all times.

Audience

Maintenance Technicians working on OTM/BCS/TRS/OLET within Fleet and Engineering, daily activities involve maintaining, faultfinding, repairing hydraulic/pneumatic and associated control systems.

Duration: 2 Days Day(s) **Class Size:** 8
