Railway Operations

Course Name

Engineering Works

Course Description

This training course is designed to provide learners with knowledge of Engineering Works and provide them with the opportunity to understand how this applies to their role and day-to-day work.

Specifically, the aim of this eLearning is to enhance your understanding of the end-to-end process of engineering works and the impact overruns and emergency possessions can have on the network..

Audience

This course is intended for employees who work within Operations Control. This includes roles such as Incident Controllers, Train Running Controllers, Support Controllers, Infrastructure Controllers, Route Control Centre. This course may also be of interest to other people who work within Operations in a different capacity as listed above.

Duration: 0.25 Day(s) **Class Size:**
