Signal Engineering

Course Name

Introduction to Signalling Testing Processes

Course Description

This training course will provide an understanding to why testing is required and the associated risks that can be caused if not undertaken correctly. This course primarily focuses on the Clapham disaster, Dalwhinnie derailment and Waterloo incident. An over-arching training solution will ensure we don't forget the lessons of the past as this can be the cause of failures resulting in derailment or collisions.

Audience

This course is aimed at anyone requiring an understanding of the testing processes. To both internal and external staff who require an understanding of why testing of signalling systems is important.

Duration: 0.25 Day(s) **Class Size:**
