

Lineside Management

Course Name

Drainage & Lineside - Drainage Inspection & Maintenance Level 1

Course Description

This e-learning course covers important topics like the drainage lifecycle, Network Rail Standards, and standard drainage components. Participants will learn about safety principles, inspection and maintenance processes, and best practices. They will understand how to update asset registers after inspections or maintenance activities and the criteria for disposing of drainage components. This course provides a clear understanding of drainage inspection and maintenance, helping learners perform their duties safely and effectively according to Network Rail standards.

Audience

Individuals responsible for off track maintenance or renewals involving railway drainage, including maintenance and inspection tasks. Also, individuals who interact with those performing these tasks.

Duration: 0.25 Day(s) **Class Size:**
