

Lineside Management

Course Name

Drainage & Lineside - Drainage Rapid Response Level 1 & 2

Course Description

This e-learning course will allow participants to recall the Network Rail Standards related to drainage rapid response and understand where to apply them. They will learn the immediate steps to take when alerted to a drainage related rapid response event and when arriving on-site. Participants will also gain an understanding of the Rapid Response key steps outlined in the Drainage Maintenance standard NR/L2/CIV/005/11, the importance of the Drainage Management Plan in rapid response situations, the decision making process for immediate action during flooding events, and the steps to close the rapid response activity and follow-up. By completing this module, participants will have the knowledge and skills to effectively respond to drainage-related emergencies and follow the appropriate protocols outlined in the standards. Upon completion of this course and successfully passing the assessment, Level 1 and 2 Professional Competence will be awarded.

Audience

Individuals responsible for responding to drainage-related emergencies and taking immediate action, as well as those responsible for managing follow up actions to flooding events.

Duration: 0.25 Day(s) **Class Size:**

Competence Name Awarded

Drainage Rapid Response

Competence Awarded

DRA-R01

Course Code

DRA-R01

Prerequisite Name

Drainage Inspection Drainage Maintenance

Prerequisite Short Code

DRA-I01, DRA-M01

Skills Assessment Scheme Regime**Course Type**

Elearning
