

Lineside Management

Course Name

Drainage & Lineside - Boundary Measures Inspection Level 2

Course Description

This face-to-face practical course focuses on conducting boundary measures inspections in accordance with NR/L2/OTK/5100 standards. Participants will learn different methods of boundary inspection, how to assess the condition and adequacy of boundary measures, and how to evaluate the likelihood of incursions. The course covers the process for addressing defects identified during inspections and emphasises the importance of clear communication skills when interacting with colleagues during boundary inspections, using the specified terminology. By completing this course, participants will demonstrate an understanding of boundary measures inspection and be equipped to conduct thorough and effective inspections in compliance with the standards, and be awarded Professional Competence Level 2 - Understanding.

Audience

Individuals involved in off-track maintenance and responsible for boundary measure inspection as part of their daily work. Also, individuals who interact with those performing these tasks.

Duration: 2 Day(s) **Class Size:** 8
