

Professional Development

Course Name

Energy and Waste Management Foundation Course

Course Description

This course highlights the impact our current usage of Energy is having on the environment, and gives examples of best practices for how we can negate these impacts through recycling and better energy management. It also covers how effective waste management contributes to our overall efficiency and how we, as a company, can reduce our landfill footprint.

Audience

All NR Staff

Duration: 0.1 Day(s) **Class Size:** n/a
