

Signal Engineering

Course Name

Foundation Control Systems

Course Description

This module is designed to train persons who are responsible for undertaking maintenance activities on signalling control systems. It is designed as a first course at the overview level to prepare staff for more in-depth equipment specific training. This module does not in itself confer specific system competence, but rather prepares the delegate for more equipment specific training designed to deliver competence.

Audience

Before attending this training a person should have successfully completed: Basic signalling courses such as SE1 & SE2 and have experience of signalling maintenance on conventional signalling technology.

Duration: 2.5 Day(s) **Class Size:** 6

Competence Name Awarded

Undertake corrective and preventative maintenance of control systems.

Competence Awarded

Sig 20
