

Track Engineering

Course Name

Interim Manual Rail Grinding of Plain Line, S & C - External 1-day Assessment

Course Description

It is acknowledged that there are a number of Grinding Operatives in the Supply Chain who have long experience and good level of knowledge and skills. For those colleagues, attending a full 10-day course will not be productive or cost-effective, and may also create backlogs with planned grinding work on Network Rail track infrastructure.

This 1-day external assessment is for existing grinding personnel to confirm that they are working to the requirements of Network Rail standards, and for compliance with the Temporary Variation TR49315 to standard NR/L2/TRK/053.

Audience

• Grinding Team Leaders • Grinding Technicians • Grinding Operatives

Duration: 1 Day(s) **Class Size:** 6

Competence Name Awarded

Interim Manual Rail Grinding of Plain Line, S & C - External 1-day Assessment

Competence Awarded

Tr80b

Course Code

Tr80b

Prerequisite Name

Undertake Liquid Penetrant Testing, Undertake Magnetic Particle Testing, PUWER

Prerequisite Short Code

NDT LPT, NDT MPT, NCB - GEN29

Skills Assessment Scheme Regime**Course Type**

Face to Face - Personal Protective Equipment

Download Date: 19/5/2024
